DIRECTOR OF CENTRAL INTELLIGENCE
Security Committee

Serial: PerSSub-M-003-82
28 APR 1982

MEMORANDUM FOR CHAIRMAN, DCI SECURITY COMMITTEE

SUBJECT: FY1984 PerSSub Budget Request

REFERENCES: a. SECOM memorandum, SECOM-D-123, Subject: FY1984 SECOM Budget, dated 6 April 1982.

b. SECOM note, SECOM-D-154, Subject: FY1984 Budget, dated 21 April 1982.

1. Per your request on 26 April 1982 for same-day advisement of FY84 PerSSub budget request, I subsequently telephonically provided the needed information to Ward Greene. This memorandum confirms the latter conversation, provides more extensive explanation and justification, and constitutes the PerSSub budget request for FY1984 as solicited by referenced correspondence.

2. The subcommittee's FY1984 budget request is attached. All requested funds would be beneficial to the Intelligence Community at large and also meet other SECOM requirements specified in Reference a. As I explained to Ward, the PerSSub's budget request is based on the assumption that we will have continued use of the [redacted] and related support for the conduct of the DCI Adjudicators' Conferences and other security training and orientation programs. Should we be forced to find another setting or other support capability for these activities, it may impact on our budgetary needs. Additionally, I made no provision for any travel or attendance at outside conferences because I understand these matters would be covered by SECOM funds separate from the PerSSub budget. STAT

3. If you have questions or need further articulation of any item, just let me know.

STAT

[redacted]
Chairman
Personnel Security Subcommittee

Encl:
a/s

DIRECTOR OF CENTRAL INTELLIGENCE
Security Committee

Personnel Security Subcommittee Budget Request
FY1984

New Programs:

Item 1.: A study researching the validity of polygraph screening examination techniques: [redacted] STAT

Justification: The Intelligence Community is considering expanded use of the polygraph as a screening technique, indeed, two of its members use it extensively now: CIA and NSA. The Sep 1979 HPSCI Report on Intelligence Agencies Security Clearance Procedures recommended Community-wide criteria be established regarding polygraph use. This research study would be a requisite first step toward establishing such Community-wide criteria.

Item 2.: A study researching the validity and applicability of non-verbal deception techniques: [redacted] STAT

Justification: Investigative methods have recently centered on the value of personal interviews of subjects to the point where this is virtually a universally accepted aspect of a personnel security investigation affecting all IC agencies. Such a study would represent the first step of a plan to ultimately instruct investigators on the meaning and use of non-verbal deception techniques during personal interviews.

Item 3.: Research study into the predictability of human behavior in the SCI personnel security program context: [redacted] STAT

Justification: Per DCID 1/14, personnel security standards for access to SCI include that, "the individual shall be stable, of excellent character and discretion...." These standards would suggest that psychological assessments be a part of the adjudicative process. Also, when granting SCI access to a person, this is in essence a predication of that person's behavior, i.e., that it will continue to be in the "national interest". Such circumstances beg for a psychological predictability study of the nature suggested above.

Item 4.: A follow-on evaluation of the relative value of the essential elements of investigation, a data analysis of the ISWG personnel security study of 1980: [redacted] STAT

Justification: With investigative resources constantly at a premium, it is imperative that we provide objective, empirical data showing the relative value of sources of information. This will enable a more cost-effective application of investigative resources in the future.

STAT

Item 5.: Establishment and maintenance of an adjudicative library at each IC member adjudicative center, comprised of books, studies, and periodicals.

STAT

Justification: The nature of the adjudication function requires an ongoing awareness of state-of-the-art CI activity and various psychological studies, reviews, and observations. A decentralized library covering these areas would be of inestimable value in maintaining the on-the-spot awareness level of adjudicators.
